# Agenda

- All Wales Summary
- Health Board Title – Our Work
- Key themes / findings
- Hospitals
- Mental Health
- GP's
- Dentists

# All Wales Summary

**This year HIW completed 206 visits to various wards, establishments, health boards and healthcare providers across Wales in the NHS and in the independent sector**

**In 2019-2020 we did:**

- 37 general hospital inspections
- 1 surgical inspection
- 25 GP inspections
- 68 dental inspections
- 28 inspections of NHS and independent mental health units
- 3 inspections of community mental health teams
- 5 IR(ME)R inspections
- 41 inspections of Independent care providers
- We received 367 concerns about health services. 15 of these were categorised as needing urgent action

# Betsi Cadwaladr – Our work

- 7 hospital inspections
- 6 general practice inspections
- 8 dental practice inspections
- 3 mental health inspections

# Betsi Cadwaladr – Our work

Eirlys Dental Practice	Dental Inspection
Total Orthodontics Wrexham	Dental Inspection
Beauwood Dental Care	Dental Inspection

# Betsi Cadwaladr – Our work

Setting	Inspection Type
BUPA Dental Care Colwyn Bay	Dental Inspection

# Key themes/findings

Overall, across all inspections, patients felt they were treated with respect by staff and the quality of the care they received was of a good standard.

There are issues across the HB with regards to training being provided and kept up to date, as well as the overall standard of record keeping.

A key message to highlight is that it is clear that action isn't always taken as a result of HIW inspections, and this has been particularly evident across the two hospital Mental Health inspections conducted in 2018/19. This is concerning given this was highlighted in 2017 and 2018, and is still an issue across the HB.

# Hospitals

**There were 7 hospital inspections in Betsi Cadwaladr during 2019-2020 – Ysbyty Alltwen, Ysbyty Gwynedd , Wrexham Maelor Hospital, Glan Clwyd Hospital, Ysbyty Gwynedd, Wrexham Maelor Hospital, BCUHB Birth Units**

## Good practice or positive findings:

- Good evidence of person-centred care and staff engagement
- Safe and effective care demonstrated across the range of inspections
- Good arrangements in place in maternity to provide women and families with bereavement and perinatal mental health support.

## Themes or most significant areas where improvements were required:

- Poor infection prevention and control compliance in some areas
- Learning from audit, concerns and incidents
- Overall governance and leadership within the community birthing units.

# Mental Health

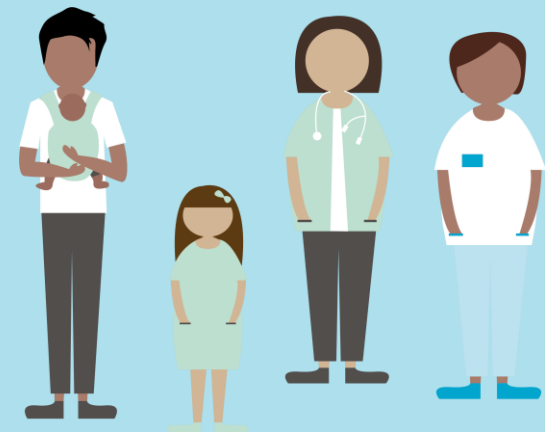

**There were 3 mental health inspections during 2019-2020 –Cefni Hospital, Wrexham CMHT, Bryn Y Neuadd Hospital**

## Good practice or positive findings:

- Positive feedback from service users regarding staff engagement and person centred care planning and provision
- Clinical auditing, reporting and escalation processes good within CMHT Care
- Established governance arrangements that provide safe and clinically effective care.

## Themes or most significant areas where improvements were required:

- Provision of information available for patients
- Safe and effective medicines management
- Assessing of ligature risks.

# GPS

**There were 6 GP inspections during 2019-2020 – Stables Medical Centre, Bron Derw Medical Centre, Meddygfa Gyffin, Hillcrest Medical Centre, Panton Surgery, Ty Doctor**

**Good practice or positive findings:**

- Patients treated with dignity and respect and engaged throughout care
- Good evidence of robust record keeping
- Staff within all inspections happy within their roles.

**Themes or most significant areas where improvements were required:**

- Infection prevention and control measures require strengthening
- Staff personnel records review required to ensure compliance is clearly documented such as DBC, immunisations and training compliance.

# Dentists

**There were 8 Dental inspections during 2019-2020.**

## Good practice or positive findings:

- Good mechanisms for obtaining and responding to patient feedback
- Suitable range of health promotion and oral hygiene material
- Appropriate adult and child safeguarding training.

## Themes or most significant areas where improvements were required:

- Use of clinical audits to be expanded, particularly smoking cessation and antimicrobial prescribing
- Infection prevention and control measures require strengthening
- Sharps bins to be wall mounted.

# Thank you. Any questions?

**Emma Algieri Scott**
