

### Use of Dycem non-slip mat

The non-slip mat is used to help the child when eating at meal times. The mat is placed under the plate and stops it moving when the child is eating. This helps the child eat more tidily.

The dycem should be washed regularly in warm soapy water and allowed to dry before it is used to regain its nonslip properties.

You may purchase dycem from the following suppliers or contact the occupational therapy department if you need a small piece:
